Tangible personal property is every physical item subject to ownership, except real and intangible property.

Lessors and Lessees of Tangible Personal Property—Leased property must be listed by the owner on Revenue Form 62A500, regardless of the lease agreement's terms regarding tax liability. Classify leased assets based upon their economic life. Leases which transfer all of the benefits and risks inherent in the ownership of the property such as a capital lease should be reported by the lessee. A rental agreement which may be for any term and may be cancelable or non-cancelable for a fixed period of time and there is no transfer of ownership such as an operating lease should be reported by the lessor. Depreciable Assets—List assets on the appropriate schedule(s) at original cost. Apply appropriate factor(s) to obtain reported value. Do not use book depreciation for computing the fair cash value of depreciable assets. **For tangible property tax purposes, assets are never fully depreciated and must be reported. Assets expensed with a useful life of greater than a year should also be reported on 62A500.**

Manufacturing Machinery—List machinery actually engaged in the manufacturing process, whether owned or leased, on Revenue Form 62A500, Schedule B. Manufacturing begins at the point the raw material enters

a process and is acted upon to change its size, shape or composition and ends when the product is ready for sale on the open market.

Manufacturing Machinery does not include the following:

- Activities preceding the introduction of the raw materials into the manufacturing process.
- Activities following the point at which the finished product is packaged and/ or ready for sale on the open market.
- Activities where the already manufactured product is merely being made more attractive or more convenient for the customer is not considered part of the manufacturing process.

Examples include engineering, maintenance, inspection, receiving, shipping, retail monogramming/ embroidery, and quality control conducted independent from the manufacturing process.

Inventories—List inventories at fair cash value using full absorption first-in-first-out (FIFO) costing. Such costs include freight, labor, taxes and duties. LIFO deductions are not allowable. See line 31 instructions for details. The owner of consigned manufacturing or merchandising inventory must list the property. Kentucky merchants must list merchandise consigned by a nonresident on the Consignee Tangible Personal Property Tax Return, Revenue Form 62A500-C. For consignee reporting requirements, see the instructions for Revenue Form 62A500-C.

Automobile dealers must report **all** vehicles whether new, used, dealer assigned, titled, untitled, registered, or unregistered held for sale as motor vehicle inventory. All new vehicles are valued at the dealer's cost and used vehicles are valued at the JD Power average trade-in value. Include a list of motor vehicles with the 62A500-S1 return. The list must include make, model, year, Kentucky license plate number, if applicable, and vehicle identification number (VIN).

Farming Equipment and Livestock—Farm implements, farm machinery and livestock owned by, or leased to, a person actually engaged in farming should be reported on Form 62A500. See line 50 instructions for details.

Foreign Trade Zones—Tangible property located within an **activated** foreign trade zone, as designated under Title 19 U.S.C. Sec. 81, is subject to a state rate only. The business must file a tangible return to claim Foreign Trade Zone status. Attach a copy of the foreign trade zone activation certificate or letter.

Pollution Control Facility—Tangible property of a qualifying pollution control facility is subject to a state rate only. A taxpayer must have an approved pollution control exemption certificate issued by the Kentucky Department of Revenue. Applications for pollution control tax exemption certificates can be submitted using Form 61A216. List qualifying property on Form 62A500, Schedule B.

Industrial Revenue Bonds—Tangible personal property owned and financed by a tax-exempt governmental unit or tax-exempt statutory authority, as defined under KRS 103.200, is subject to a state rate only. This includes all privately owned leasehold interests in industrial buildings owned and financed by a tax-exempt governmental unit or tax-exempt statutory authority. Report personal property value on Form 62A500, line 39. See line-by-line instructions for details.

Rebuilds or Capitalized Repairs—Cost figures for rebuilt equipment must be segregated according to “original” and “rebuild” costs and listed under two economic life classes on the tangible personal property tax return. The original cost of all assets is included in the year of acquisition in the appropriate class life. Any rebuild(s) capitalized for book or tax purposes are to be entered in the appropriate class life for the expected life of the rebuild. If a second rebuild occurs, the second rebuild is again included in age 1 of the appropriate class for the expected life of that rebuild. The first rebuild is then deleted from the original cost column and dropped from the valuation process.

Exceptions to the Fair Cash Value Computation

Taxable property inoperable and held for disposal as of the assessment date may be valued separately. List this property on Schedule C and include an affidavit explaining the circumstances and the basis for valuation. Such property is valued as follows:

- if component parts have been removed and the remainder is useless to the business, report the actual scrap or salvage value; or
- if a visual inspection confirms that useful life has not ended, the true value is the greater of its depreciated book value or the actual salvage value; or
- property sold on or before the due date of the return through a proven arm’s length transaction, is reported at the selling price.

Temporary idleness is not sufficient cause for separate valuation. This includes idleness attributed to seasonal operation or from repair or overhaul of equipment. Idled equipment no longer actually engaged in manufacturing is Schedule A property and subject to full local rates.

Listing and Valuing Tangible Personal Property

List depreciable property on Form 62A500, Schedule A or B, based on its economic life. To assist taxpayers in determining proper economic life classification a partial listing of North American Industrial Classification System (NAICS) codes is included. Property descriptions frequently used in these specific industries are listed under each code. Most businesses have property falling into more than one economic life classification.

An asset listing of each item of property must be available to the Department of Revenue upon request. The asset listing should include original cost, acquisition date, make, model, serial number and/or other identification numbers.

Fair Cash Value Computation

The fair cash value computation begins with cost. **Cost must include inbound freight, mill-wrighting, overhead, investment tax credits, assembly and installation labor, material and expenses, and sales and use taxes.** Premium pay and payroll taxes are included in labor costs. Costs are not reduced by trade-in allowances. Capitalize costs of major overhauls in the year in which they occur.

Cost should be net of additions, disposals and transfers occurring during the year. Multiply aggregate cost by the applicable conversion factor to determine reported value. The column totals represent the total original cost and total reported value of each class of property. Original cost totals must generally reconcile with the book cost. **NOTE: Property written off the records, but still physically on hand, must be included in the computation.**

GENERAL INFORMATION

Revenue Form 62A500

Alternative Reporting Requirement

Tangible property should be reported using the composite factors, methods, and guidelines provided with Form 62A500.

If a taxpayer believes the composite factors in the return have overvalued or undervalued the property, the taxpayer may petition the Department of Revenue to accept an alternative reporting method. The taxpayer must file the return and affidavit of alternative valuation with the **Division of State Valuation, not the local PVA**, and check the alternative method valuation check box on page 1 of 62A500. The affidavit must include a proposed alternative valuation method, justification of the method chosen, detailed documentation, including, but not limited to: independent appraisals, actual production, and sales and usage reports, that support the proposed method. **Accepting the alternative valuation method as filed in order to expedite the processing of the return, does not affect the department's right to eventually audit the return and the method used.**

For valuation information or assistance in filing this return, contact the PVA in your county (see the addresses and telephone numbers in these instructions) or the Division of State Valuation at (502) 564-2557. Go to revenue.ky.gov to download forms.

General Information—The following information is required to accurately process the return.

- Federal Employer Identification Number or Social Security Number; only use Social Security Number in absence of Federal Employer Identification Number.
- NAICS code that most closely identifies your business activity;
- type of business activity;
- tangible personal property listings in other Kentucky counties (check appropriate box);
- name and address of business;
- **property location (street address);**
- county where the property is physically located;
- organization type (check appropriate box); and
- taxpayer signature, email, and telephone number and the preparer's (other than taxpayer) name and contact information at the bottom of Form 62A500, Schedule C.

Failure to properly complete the general information section may result in omitted property notices, subject to penalties and interest.

Instructions for Lines 11–16 and 21–26 (Depreciable Assets)

Schedule A property includes, but is not limited to:

- business furniture and fixtures;
- professional trade tools and equipment;
- signs and billboards;

- drilling, mining and construction equipment;
- computers and related peripheral equipment; and
- telephone, cable and cellular towers.

Schedule B property includes:

- qualifying commercial radio and television equipment;
- qualified pollution control facilities; and
- manufacturing machinery and computer equipment controlling the machinery; and
- radio and television towers.

Schedules A and B list six economic life classes. **Property is classified by the expected economic life, not the depreciable life used for accelerated income tax purposes.**

The age of property, whether purchased new or used, is determined as follows: property purchased in the year prior to the assessment date is age 1; purchases made 2 years prior are age 2; etc. Assets listed into Classes I, II and III, whose ages exceed the maximum age for each class (13 years), should be aggregated on "Age 13+" of the original cost column. Assets listed into Classes IV and V whose ages exceed the maximum age for each class (27 years) should be aggregated on "Age 27+" of the original cost column. As long as an asset is in use, it is valued using the appropriate factor as determined by its class and age. For Class VI assets whose age is greater than 27 years contact the State Valuation Branch for the appropriate factor.

Multiply the original cost by the conversion factor to arrive at the reported value. Add original costs for each class to determine the total original cost by class. Add reported values for each class to determine the total reported value by class. The column totals for original cost and reported value for each class of property are listed in the space provided for Schedule A and B property on Form 62A500, page 1. The grand total of original cost and reported value for all classes of property are summarized on lines 17 and 27.

All fully depreciated assets must continue to be reported, as long as they are on hand, in the manner described above.

Industrial Revenue Bond Property—Tangible personal property purchased with an industrial revenue bond (IRB) is subject to taxation at a state rate only. **This rate shall not apply to the portion of value of the leasehold interest created through any private financing.** Upon expiration of the bond, property is fully reportable on Schedules A and B at the appropriate age. The information necessary for calculation of taxable value of IRB property includes the following:

- the amount of the bond,
- the real property assessment,
- the personal property assessment,
- the life of the bond, and
- recipient of the property upon full amortization of the bond.

The valuation of industrial revenue bond personal property contemplates ownership upon full amortization of the bond issue. If the property converts to the private entity upon full amortization, the property is assessed higher as the bond ages and as the private enterprise assumes a greater leasehold interest.

The following example provides the basics of IRB property valuation:

| | | |
|---|---|----------------|
| Total industrial revenue bond value | — | \$11,000,000 |
| Real property valuation | — | \$1,000,000 |
| Life of the bond issue | — | 20 Years |
| The private entity receives the IRB property upon amortization of the issuance. | | |
| Total industrial revenue bond | | \$11,000,000 |
| Less: Real property valuation | | (\$ 1,000,000) |
| Tangible personal property cost | | \$10,000,000 |

All machinery purchased under the IRB must first be segregated and calculated as described for lines 11–16 and 21–26.

Step 1: \$10,000,000 X Economic Life Factor =
Reported Value

Step 2: Reported Value X Actual Property Age/20
(e.g., life of the IRB)

Step 3: Carry Step 2 result to Form 62A500, line 39.

Conversely, if the tax-exempt statutory authority ultimately receives the property, the assessed valuation for taxation purposes begins at 100 percent and is fully amortized over the life of the bond.

Contact the Division of State Valuation at (502) 564-2557 with questions or for additional information and instruction.

Qualifying Voluntary Environmental Remediation Property—Provided the property owner has corrected the effect of all known releases of hazardous substances, pollutants, contaminants, petroleum, or petroleum products located on the property consistent with a corrective action plan approved by the Energy and Environment Cabinet pursuant to KRS 224.1-400, 224.1-405, or 224.60-135, and provided the cleanup was not financed through a public grant or the petroleum storage tank environmental assurance fund, the property may be reported on Line 39. This rate shall apply for a period of three (3) years following the Energy and Environment Cabinet’s issuance of a No Further Action Letter or its equivalent, after which the regular tax rate shall apply.

50 Livestock and Farm Equipment—List the fair cash value of all owned or leased farm equipment and livestock. The Miscellaneous Worksheet can be used for depreciation purposes.

Supply items are valued at original cost in the amount on hand at year-end. Returnable containers, such as barrels, bottles, carboys, coops, cylinders, drums, reels, etc., are valued separately at original cost. In absence of year end totals, use the yearly expense accounts total divided by 12.

List the fair market value of all coin collections, stamp collections, art works, other collectibles and research libraries. List the number of ounces of all gold, silver, platinum and other precious metals. If the market value of a precious metal is known, list the value per ounce as of the preceding December 31 in the Value Per Ounce column. Multiply the number of ounces by the value per ounce to determine the total fair market value.

70 Activated Foreign Trade Zone—Tangible personal property located within an activated foreign trade zone as designated under Title 19 U.S.C. Section 81 is subject to taxation at a state rate only. Include additional information regarding avionics equipment, engine hours, condition and other documentation that may influence the aircraft value in the space provided. Do not list aircraft assessed as public service company property. **List aircraft used in the business of transporting persons or property for compensation or hire and not assessed as a public utility on Revenue Form 62A500, Schedule C. Taxation is based on the situs of the aircraft, on January 1st or the majority of the year, regardless of the owner's residency.**

Refund requests should be accompanied by clear and concise documentation to support any changes from the original return filed. Documentation can include but not limited to fixed asset listings/depreciation schedules and/or inventory records.

KRS 134.590 (2) No state government agency shall authorize a refund unless each taxpayer individually applies for a refund within two (2) years from the date the taxpayer paid the tax. Each claim or application for a refund shall be in writing and state the specific grounds upon which it is based.

Pursuant to KRS 134.590(6), a taxpayer seeking a refund of taxes paid to a local taxing entity (such as a board of education) must file a refund request with that taxing entity within two years of payment of the taxes, unless the taxpayer has instituted litigation against the local taxing entity. Each claim or application for a refund shall be in writing and state the specific grounds upon which it is based.

See also OAG 83-202 ("KRS 134.590...requires that refund requests be filed with the Department of Revenue and any other taxing district that has received these taxes (city, county, school district, etc.) within two years from the date payment was made.")

Property Classification Guidelines

Property is classified by the expected economic life, not the depreciable life used for accelerated income tax purposes. To assist taxpayers in determining proper economic life classification, a partial listing of the North American Industry Classification System (NAICS) codes follows. Property descriptions frequently used in these specific industries are listed under each code. Most businesses have property falling into more than one economic life classification.

GENERAL BUSINESS ACTIVITIES CLASS

General business purpose integrated computer systems and related peripheral equipment, such as computers, micro-processors, terminals, servers, printers, data entry equipment and pre-written software. I

General administrative activities involving data handling equipment such as typewriters, calculators, adding and accounting machines, copiers and duplicating equipment, and fax machines. II

General administrative activities involving the use of desks, file cabinets, communications equipment, security systems, and other office furniture, fixtures and equipment. III

Only dozers, tractors, off-road trucks and loaders used in mining and construction. IV

NOTE: There is no single class for computers and related hardware used to control manufacturing processes.
